

CHIR PATEL

FULL STACK DEVELOPER | SOFTWARE ENGINEER

Pune, India | +91 - 8200394603 | chirpatelss@gmail.com | LinkedIn: [chir-patel-b4762b172](#) | [chir.in](#)

PROFESSIONAL SUMMARY

Senior Full Stack Developer with 4+ years of experience in designing and implementing scalable, high-performance solutions for complex business requirements. Specializes in automating workflows to improve operational efficiency. Led a project that reduced process times by 98% and eliminated manual tasks equivalent to 30+ Full-Time Equivalents. Expertise includes developing configurable workflow engines for seamless automation of thousands of daily processes, as well as robust application maintenance and timely resolution of technical issues. Played a key role in release management, overseeing production deployments and ensuring smooth implementation of changes. Proven ability to lead teams effectively, guiding a 10+ member POD to deliver high-quality results while meeting tight deadlines and adapting to evolving project needs. Committed to delivering innovative, practical solutions that enhance user experiences and drive organizational success.

CAREER HIGHLIGHTS

- **Automation Achiever**, Led the transformation of an intricate process by implementing advanced automation, reducing execution time from hours to minutes and redefining operational standards.
- **Innovative Architect**, Created and implemented a fully configurable workflow that transformed automation processes, driving efficiency and scalability across operations.
- **Team Leader Extraordinaire**, Over 2 years of experience leading a high-performing engineering team of innovators and developers, fostering creativity and success.

PROFESSIONAL EXPERIENCE

BNY - Senior Associate Full Stack Developer

Pune, India

07/2021 - Present

- Led efforts to develop resilient and scalable solutions, delivering tailored services to existing and new BNY clients, while driving impactful innovations in the Senior Full Stack Developer role.
- Designed and implemented automation that reduced process time from hours to minutes, streamlined workflows for 30+ Full Time Equivalent and eliminated 50+ manual tasks daily, dramatically enhancing operational efficiency.
- Key contributor in designing a fully configurable, reusable, and scalable workflow engine, empowering the seamless automation of over 1,500 workflows daily to enhance operational efficiency and reliability.
- Contributed over 2 years to the Release Management Team, expertly supporting, tracking and deploying production changes with precision on a monthly schedule.
- Played an integral role in the Maintenance Team for over 3 years, delivering outstanding user support, ensuring prompt security renewals, resolving application issues and driving the implementation of innovative new solutions.
- Led a high-performing Agile POD of 10+ members, ensuring timely delivery of user requirements and backlog stories while driving iterative development, efficient tracking, and seamless execution.
- Skilled in gathering and analyzing user requirements, story pointing tasks, ensuring seamless understanding, and delivering high-quality solutions on time.

AREAS OF EXPERTISE

- Workflow Optimization
- Team Leadership
- Release Management
- Application Support & Maintenance
- Process Improvement

TECHNICAL SKILLS

- JAVA
- HTML/CSS/JavaScript
- Spring Boot
- RESTful API
- Angular
- GIT
- Oracle SQL
- Continuous Integration and Continuous Delivery (CI/CD)
- Microservices
- Kafka
- REST API

EDUCATIONAL TRAINING

06/2021

Vellore Institute of Technology

Vellore, India

Bachelors of Technology:

Information Technology

PUBLICATIONS

- Secure Banking Transactions using RSA and Two Fish algorithms, IEEE Xplore, [9077714](#).
- A customized model for classification of Optical Coherence Tomography images and comparison with preexisting models, IJERCSE, [13869](#).
